

composer require s-a-c/apply-doc-standards

Standalone Installation

1. Clone the repository:

```
```bash
git clone https://github.com/s-a-c/apply-doc-standards.git
cd apply-doc-standards
```

2. Install dependencies:

```
composer install
```

3. Make the tool executable:

```
chmod +x apply-doc-standards
```

## 4. Usage

### Basic Usage

Apply standards to a single file:

```
./apply-doc-standards document.md
```

Apply standards to a directory recursively:

```
./apply-doc-standards ./docs
```

Apply standards to multiple paths:

```
./apply-doc-standards file1.md file2.md ./docs
```

### Command Line Options

Option	Short	Description
--help	-h	Show help message
--version	-v	Show version information
--recursive	-r	Process directories recursively (default)
--no-recursive		Process only specified directories
--dry-run	-n	Show what would be changed without modifying files
--force	-f	Force processing even if files appear to follow standards
--verbose		Show detailed processing information
--debug		Show debug information
--config	-c	Load configuration from file

Option	Short	Description
<code>--extensions</code>		Comma-separated list of file extensions to process

## Examples

Preview changes without modifying files:

```
./apply-doc-standards --dry-run --verbose ./docs
```

Process only specific file extensions:

```
./apply-doc-standards --extensions md,txt ./content
```

Force processing of all files:

```
./apply-doc-standards --force ./documentation
```

Use custom configuration:

```
./apply-doc-standards --config custom-config.json ./docs
```

## 5. Configuration

The tool supports configuration via JSON files. Here's an example configuration:

```
{
 "file": {
 "extensions": ["md", "markdown"],
 "exclude_patterns": [
 "vendor/",
 "node_modules/",
 ".git/"
],
 "max_file_size": 10485760
 },
 "processing": {
 "dry_run": false,
 "force": false,
 "backup": true,
 "encoding": "UTF-8",
 "line_endings": "\n"
 },
 "standards": {
 "require_introduction": true,
 "require_toc": true,
 "require_navigation": true,
 "toc_collapsible": true,
 "section_numbering": true,
 }
}
```

```

 "navigation_format": "Previous: {previous} | Next: {next} | Top"
 },
 "content": {
 "min_content_length": 100,
 "max_title_length": 100,
 "toc_min_sections": 2
 },
 "output": {
 "verbose": false,
 "show_changes": true,
 "color_output": true
 }
}

```

## 6. Documentation Standards Applied

This tool applies the following documentation standards to ensure consistency and accessibility:

### Document Structure

```

Document Title

1. Introduction
[Introductory content providing context and overview]

Table of Contents
<details><summary>Expand Table of Contents</summary>
- [2. Main Section](#2-main-section)
- [3. Next Section](#3-next-section)
</details>

2. Main Section
[Content referenced in TOC]

3. Next Section
[More content]

4. Navigation
Previous: [Previous Doc](path) | **Next:** [Next Doc](path) | **Top**

```

### Key Requirements

- **Anchored Titles:** All document titles use `<a id="document-name"></a>` format
- **Introduction Section:** Section 1 provides context and overview

- **Unnumbered TOC Heading:** Uses `## Table of Contents` (not numbered)
- **Collapsible TOC:** Wrapped in `<details>/<summary>` HTML tags
- **Numbered References:** TOC entries link to numbered sections (2., 3., 4., etc.)
- **Navigation Footer:** Standard Previous | Next | Top format
- **WCAG 2.1 AA Compliance:** All structures follow accessibility guidelines

## 7. Examples

### Before Processing

```
My Document
```

This is some content about my topic.

```
