

sebastian/code-unit-reverse-lookup

Looks up which function or method a line of code belongs to.

Installation

You can add this library as a local, per-project dependency to your project using Composer:

```
composer require sebastian/code-unit-reverse-lookup
```

If you only need this library during development, for instance to run your project's test suite, then you should add it as a development-time dependency:

```
composer require --dev sebastian/code-unit-reverse-lookup
```
