

ChangeLog

All notable changes are documented in this file using the Keep a CHANGELOG principles.

6.0.0 - 2023-02-03

Removed

- This component is no longer supported on PHP 7.3, PHP 7.4 and PHP 8.0

5.0.3 - 2020-10-26

Fixed

- `SebastianBergmann\Timer\Exception` now correctly extends `\Throwable`

5.0.2 - 2020-09-28

Changed

- Changed PHP version constraint in `composer.json` from `^7.3 || ^8.0` to `>=7.3`

5.0.1 - 2020-06-26

Added

- This component is now supported on PHP 8

5.0.0 - 2020-06-07

Changed

- Parameter type for `SebastianBergmann\Timer\Duration::fromMicroseconds()` was changed from `int` to `float`
- Parameter type for `SebastianBergmann\Timer\Duration::fromNanoseconds()` was changed from `int` to `float`
- Return type for `SebastianBergmann\Timer\Duration::asNanoseconds()` was changed from `int` to `float`

Fixed

- #31: Type Error on 32-bit systems (where `hrtime()` returns `float` instead of `int`)

4.0.0 - 2020-06-01

Added

- Introduced `Duration` value object for encapsulating a duration with nanosecond granularity
- Introduced `ResourceUsageFormatter` object for formatting resource usage with option to explicitly pass a duration (instead of looking at the unreliable `$_SERVER['REQUEST_TIME_FLOAT']` variable)

Changed

- The methods of `Timer` are no longer static
- `Timer::stop()` now returns a `Duration` value object

Removed

- Functionality that is now implemented in `Duration` and `ResourceUsageFormatter` has been removed from `Timer`

3.1.4 - 2020-04-20

Changed

- `Timer::timeSinceStartOfRequest()` no longer tries `$_SERVER['REQUEST_TIME']` when `$_SERVER['REQUEST_TIME_FLOAT']` is not available (`$_SERVER['REQUEST_TIME_FLOAT']` was added in PHP 5.4 and this library requires PHP 7.3)
- Improved exception messages when `$_SERVER['REQUEST_TIME_FLOAT']` is not set or is not of type `float`

Changed

3.1.3 - 2020-04-20

Changed

- `Timer::timeSinceStartOfRequest()` now raises an exception if `$_SERVER['REQUEST_TIME_FLOAT']` does not contain a `float` (or `$_SERVER['REQUEST_TIME']` does not contain an `int`)

3.1.2 - 2020-04-17

Changed

- Improved the fix for #30 and restored usage of `hrtime()`

3.1.1 - 2020-04-17

Fixed

- #30: Resolution of time returned by `Timer::stop()` is different than before (this reverts using `hrtime()` instead of `microtime()`)

3.1.0 - 2020-04-17

Added

- `Timer::secondsToShortTimeString()` as alternative to `Timer::secondsToTimeString()`

Changed

- `Timer::start()` and `Timer::stop()` now use `hrtime()` (high resolution monotonic timer) instead of `microtime()`
- `Timer::timeSinceStartOfRequest()` now uses `Timer::secondsToShortTimeString()` for time formatting
- Improved formatting of `Timer::secondsToTimeString()` result

3.0.0 - 2020-02-07

Removed

- This component is no longer supported on PHP 7.1 and PHP 7.2

2.1.2 - 2019-06-07

Fixed

- #21: Formatting of memory consumption does not work on 32bit systems

2.1.1 - 2019-02-20

Changed

- Improved formatting of memory consumption for `resourceUsage()`

2.1.0 - 2019-02-20

Changed

- Improved formatting of memory consumption for `resourceUsage()`

2.0.0 - 2018-02-01

Changed

- This component now uses namespaces

Removed

- This component is no longer supported on PHP 5.3, PHP 5.4, PHP 5.5, PHP 5.6, and PHP 7.0
