

ChangeLog

All notable changes are documented in this file using the Keep a CHANGELOG principles.

10.1.16 - 2024-08-22

Changed

- Updated dependencies (so that users that install using Composer's `--prefer-lowest` CLI option also get recent versions)

10.1.15 - 2024-06-29

Fixed

- #967: Identification of executable lines for `match` expressions does not work correctly

10.1.14 - 2024-03-12

Fixed

- #1033: `@codeCoverageIgnore` annotation does not work on `enum`

10.1.13 - 2024-03-09

Changed

- #1032: Pad lines in code coverage report only when colors are shown

10.1.12 - 2024-03-02

Changed

- Do not use implicitly nullable parameters

10.1.11 - 2023-12-21

Changed

- This component is now compatible with `nikic/php-parser 5.0`

10.1.10 - 2023-12-11

Fixed

- #1023: Branch Coverage and Path Coverage are not correctly reported for traits

10.1.9 - 2023-11-23

Fixed

- #1020: Single line method is ignored

10.1.8 - 2023-11-15

Fixed

- #1018: Interface methods are not ignored when their signature is split over multiple lines

10.1.7 - 2023-10-04

Fixed

- #1014: Incorrect statement count in coverage report for constructor property promotion

10.1.6 - 2023-09-19

Fixed

- #1012: Cobertura report pulls functions from report scope, not the individual element

10.1.5 - 2023-09-12

Changed

- #1011: Avoid serialization of cache data in PHP report

10.1.4 - 2023-08-31

Fixed

- Exceptions of type `SebastianBergmann\Template\Exception` are now properly handled

10.1.3 - 2023-07-26

Changed

- The result of `CodeCoverage::getReport()` is now cached

Fixed

- Static analysis cache keys do not include configuration settings that affect source code parsing

- The Clover, Cobertura, Crap4j, and PHP report writers no longer create a `php:` directory when they should write to `php://stdout`, for instance

10.1.2 - 2023-05-22

Fixed

- #998: Group Use Declarations are not handled properly

10.1.1 - 2023-04-17

Fixed

- #994: Argument `$linesToBeIgnored` of `CodeCoverage::stop()` has no effect for files that are not executed at all

10.1.0 - 2023-04-13

Added

- #982: Add option to ignore lines from code coverage

Deprecated

- The `SebastianBergmann\CodeCoverage\Filter::includeDirectory()`, `SebastianBergmann\CodeCoverage\Filter::excludeDirectory()`, and `SebastianBergmann\CodeCoverage\Filter::excludeFile()` methods are now deprecated
