1.0.0 (2019-07-11)

- First stable LTS release, now following SemVer. We'd like to emphasize that this component is production ready and battle-tested. We plan to support all long-term support (LTS) releases for at least 24 months, so you have a rock-solid foundation to build on top of.

Contains no other changes, so it's actually fully compatible with the v0.6.0 release.
