

Configure PHPStorm MCP Access to tests/

Problem

MCP currently only allows access to: - /Users/s-a-c/Desktop - /Users/s-a-c/Downloads

Your project is at /Users/s-a-c/Herd/validate-links (outside allowed directories).

Solution

Method 1: PHPStorm Settings

1. Open PHPStorm → Preferences (Cmd+,)
2. Navigate to Tools → MCP Servers
3. Add allowed directory: /Users/s-a-c/Herd/validate-links
4. Restart PHPStorm

Method 2: Environment Variable

```
export ALLOWED_DIRECTORIES="/Users/s-a-c/Desktop,/Users/s-a-c/Downloads,/Users/s-a-c/Herd/va
```

Method 3: MCP Config File

Add to MCP configuration:

```
{
  "filesystem": {
    "env": {
      "ALLOWED_DIRECTORIES": "/Users/s-a-c/Desktop,/Users/s-a-c/Downloads,/Users/s-a-c/Herd/va
    }
  }
}
```

After configuration, restart PHPStorm and test MCP access to tests/ directory.
